DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Burwell on May 10, 2005.

The application has been amended as follows:

1. (Currently Amended) A computer-implemented method of processing a document object model (DOM) tree having a tag located at a given node in the tree, comprising the steps of:

upon encountering the tag, passing given information to a method in a tag handler, wherein the tag handler is registered in a tag library, wherein the tag handler is registered in a tag library, wherein the tag library contains one or more elements defining tags, wherein an element defining the tag contains an attribute for the tag handler that processes an instance of the tag;

having the method generate a string;

parsing the string into a new DOM tree; and

replacing the given node and any child nodes with the new DOM tree.

9. (Currently Amended) A computer-implemented method of processing a document object model (DOM) tree having a tag located at a given node in the tree, comprising the steps of:

upon encountering the tag, generating a first string that is a representation of XML in the DOM tree at the given node and any child nodes of the given node;

passing the first string to a method in a tag handler, wherein the tag handler is registered in a tag library, wherein the tag library contains one or more elements defining tags, wherein an element defining the tag contains an attribute for the tag handler that processes an instance of the tag;

having the method generate an XML string;

parsing the XML string into a new DOM tree having a root node; and

replacing the given node and any child nodes with the new DOM tree, wherein the root node of the new DOM tree is positioned at the given node in the tree.

10. (Currently Amended) A computer-implemented method of processing a document object model (DOM) tree having a tag located at a given node in the tree, comprising the steps of:

upon encountering the tag, passing the given node to a method in a tag handler, wherein the tag handler is registered in a tag library, wherein the tag library contains one or more elements defining tags, wherein an element defining the tag contains an attribute for the tag handler that processes an instance of the tag;

having the method generate an XML string;

parsing the XML string into a new DOM tree having a root node; and
replacing the given node and any child nodes with the new DOM tree, wherein
the root node of the new DOM tree is positioned at the given node in the tree.

11. (Currently Amended) A computer-implemented method of processing a document
object model (DOM) tree having a plurality of custom tags, comprising the steps of:

- (a) processing the DOM tree to locate a custom tag;
- (b) upon encountering a custom tag at a given node in the tree:
 - (i) passing given information to a method in a tag handler, wherein the tag
handler is registered in a tag library, wherein the tag library contains one
or more elements defining tags, wherein an element defining the tag
contains an attribute for the tag handler that processes an instance of the
tag;
 - (ii) having the method generate a string;
 - (iii) parsing the string into a new DOM tree; and
 - (iv) replacing the given node and any child nodes with the new DOM tree;
and
- (c) repeating steps (a)-(b)

Allowable Subject Matter

- 2. Claims 1-6 and 8-20 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

The Declaration under 37 C.F.R. 1.131 filed on 1/10/05 under 37 CFR 1.131 is sufficient to overcome the Eduardo Peligri-Lopart et al., *Java Server Page*TM *Specification* (Version 1.1 Public Release, August 18, 1999) reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
